

ABOUT THE OPPORTUNITY

Advisory Committees leverage specialist knowledge to influence College strategy, member engagement, and broader professional practice.

ABOUT YOU

- College member
- Ability to consider issues strategically and contribute balanced, well-reasoned advice
- Committed to evidence-informed practice, inclusion, collegiality, and College objectives

You will:

- attend and actively participate in scheduled meetings and agreed activities
- support the development, review and delivery of agreed initiatives, resources, events, consultations, or special projects
- provide specialist, evidence-informed advice within the Advisory Committee's agreed scope
- engage respectfully with other members, College staff, and invited stakeholders, encouraging open discussion and diverse viewpoints.

COLLEGE EOI

POWERING YOUR PROFESSIONAL JOURNEY

EXPERT ADVISORY COMMITTEES

Advisory Committees contribute their specialist knowledge, experience, and perspectives to support the College's work in an identified area of practice or professional interest.

Are you committed to building the knowledge base that will shape the future of paramedicine?

Are you passionate about connecting people and ideas to strengthen patient care?

"I find the work is so energising – we're building a better foundation for our practice, a stronger culture, a brighter future."

"Getting to collaborate closely with leaders across the College means you're actually at the table, helping to shape the direction."

"It challenges you to think bigger and understand how all the moving parts connect. It changes how you think about the patient in front of you."

Build your skills and career with the College

Thought leadership

Provide expert insights to help guide the College, and position the profession for strategic success

Professional recognition

Enhance your professional profile as a subject matter expert within the College and profession

Peer collaboration

Engage with fellow experts, paramedicine leaders, and influential stakeholders across the sector

Domain mastery

Drive advancement of discipline-specific knowledge, and initiatives that develop member expertise

Systemic impact

Advance the standing and future of the paramedicine profession within the broader health system

We're with you. All the way.

This role is suitable for established paramedics with specialist expertise.
